Frank Fleming

Frank,  
Good luck this  
summer and try to  
stay out of trouble. But,  
don't worry, I'll be seeing  
you anyway. Try to grow  
a few inches, then you'll  
be as tall as me. See  
ya.  
Kevin Muculas

Frank!  
Have a good  
summer. Stay out  
of trouble. See you

There is nothing that is not worthy of notice.  
Anything noticed is thereby transformed  
or transfigured into being part of the  
grand unity which is, was, and will be.  
... looking at people is perhaps the greatest  
of the simple pleasures.  
The fascination lies in the fact that  
people are all alike yet every person is unique ...  
William Saroyan

Go Frank  
 It has been  
 real interesting in  
 health and I'll  
 never forget the  
 time our beloved  
 school nurse gave  
 us the benefit of  
 her knowledge of  
 aid. Between Cone Chamberlain  
 and Cindy Medoff I don't know  
 which is the craziest. Given  
 though I don't know your  
 too well I can say that  
 you have a real nice person  
 to have around. Have a  
 nice summer. Have a  
 year and  
 years to come  
 Lauren Cox

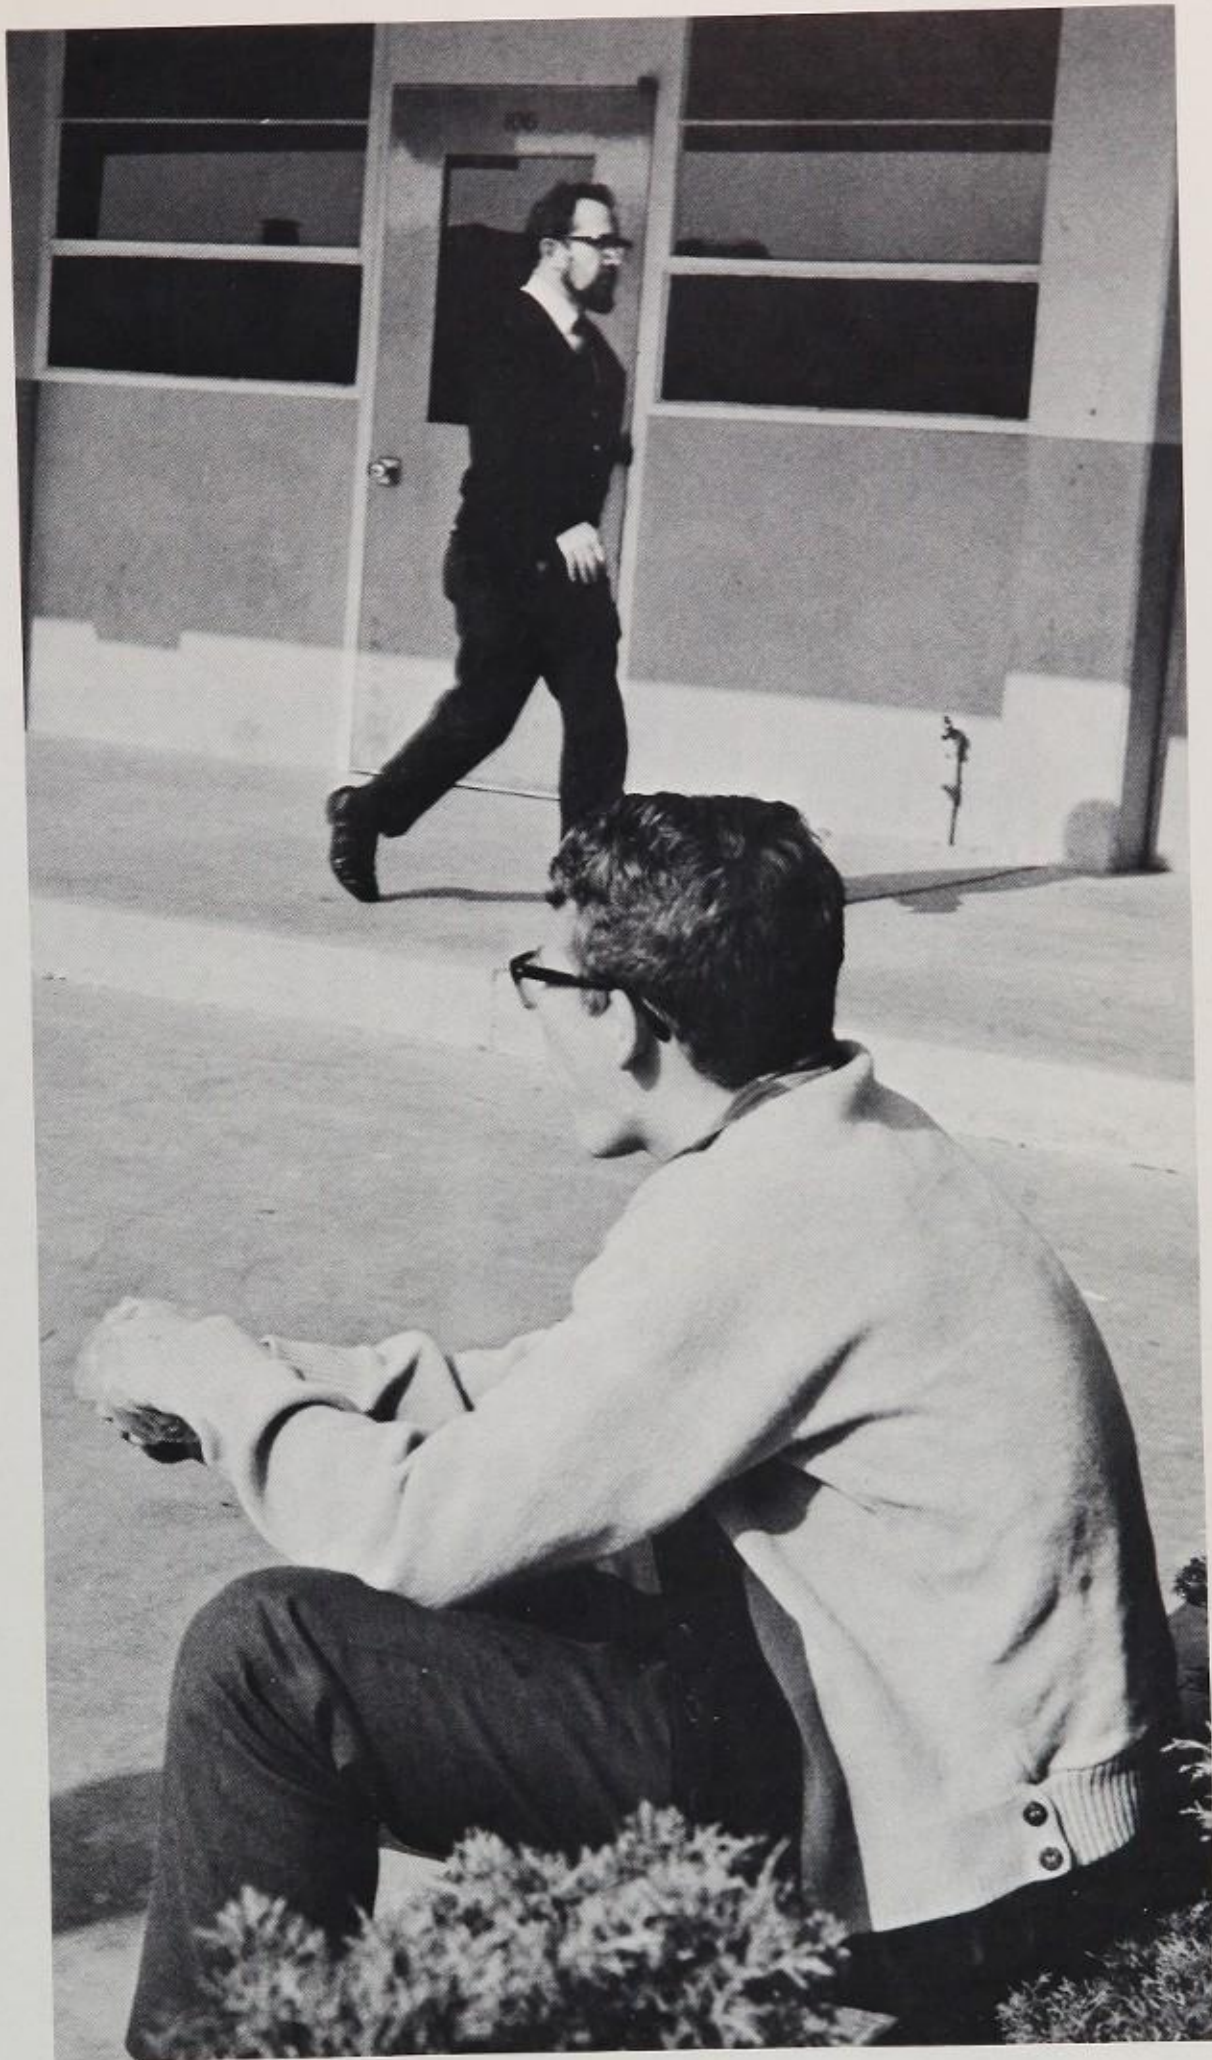

... when I was young  
discovering and plucking from trees  
the bitter and sweet fruit  
to place upon my tongue ...

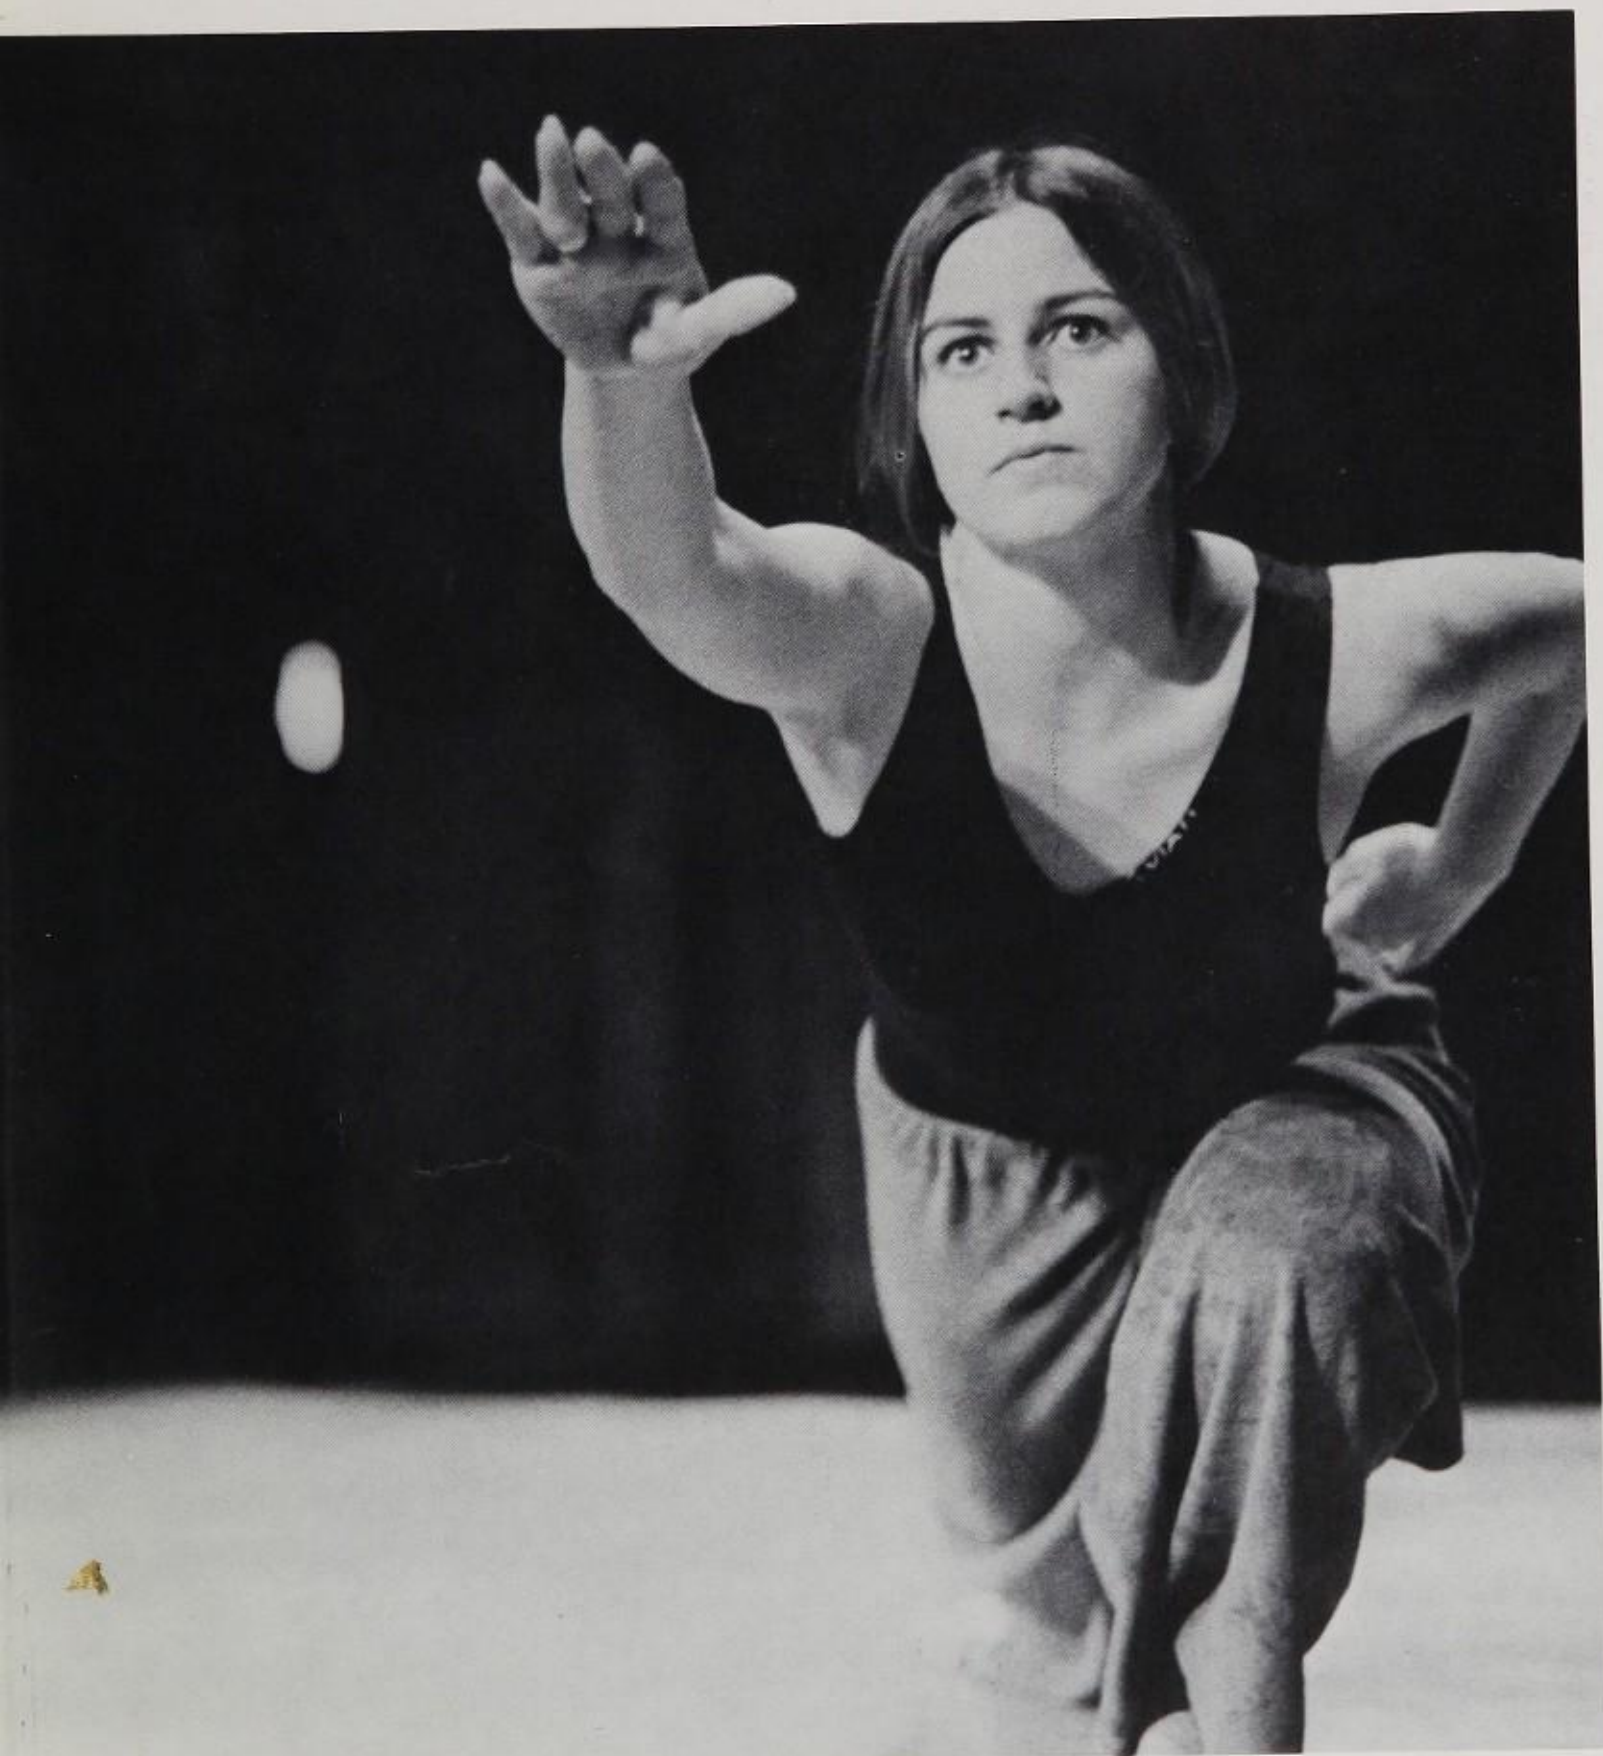

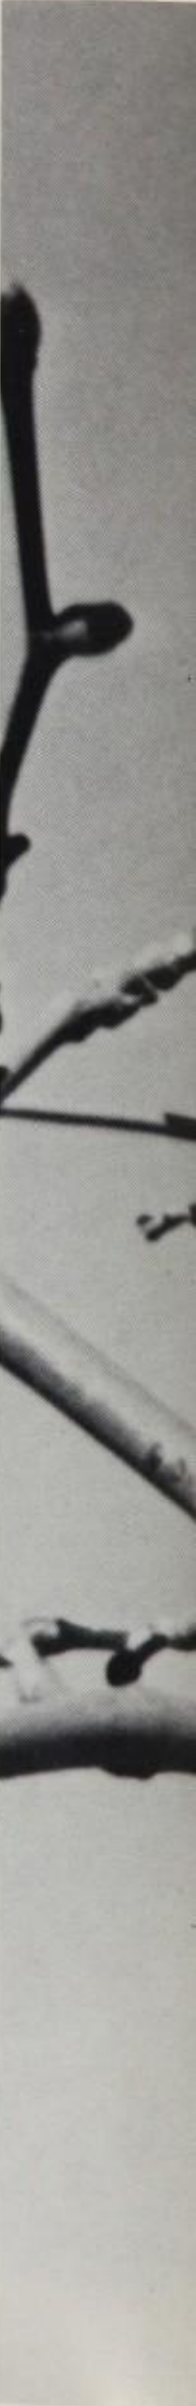

... the experience of both  
to lend to self the highest shadow,  
illuminated by the sun and the moon,  
wind and rain, night and day ...

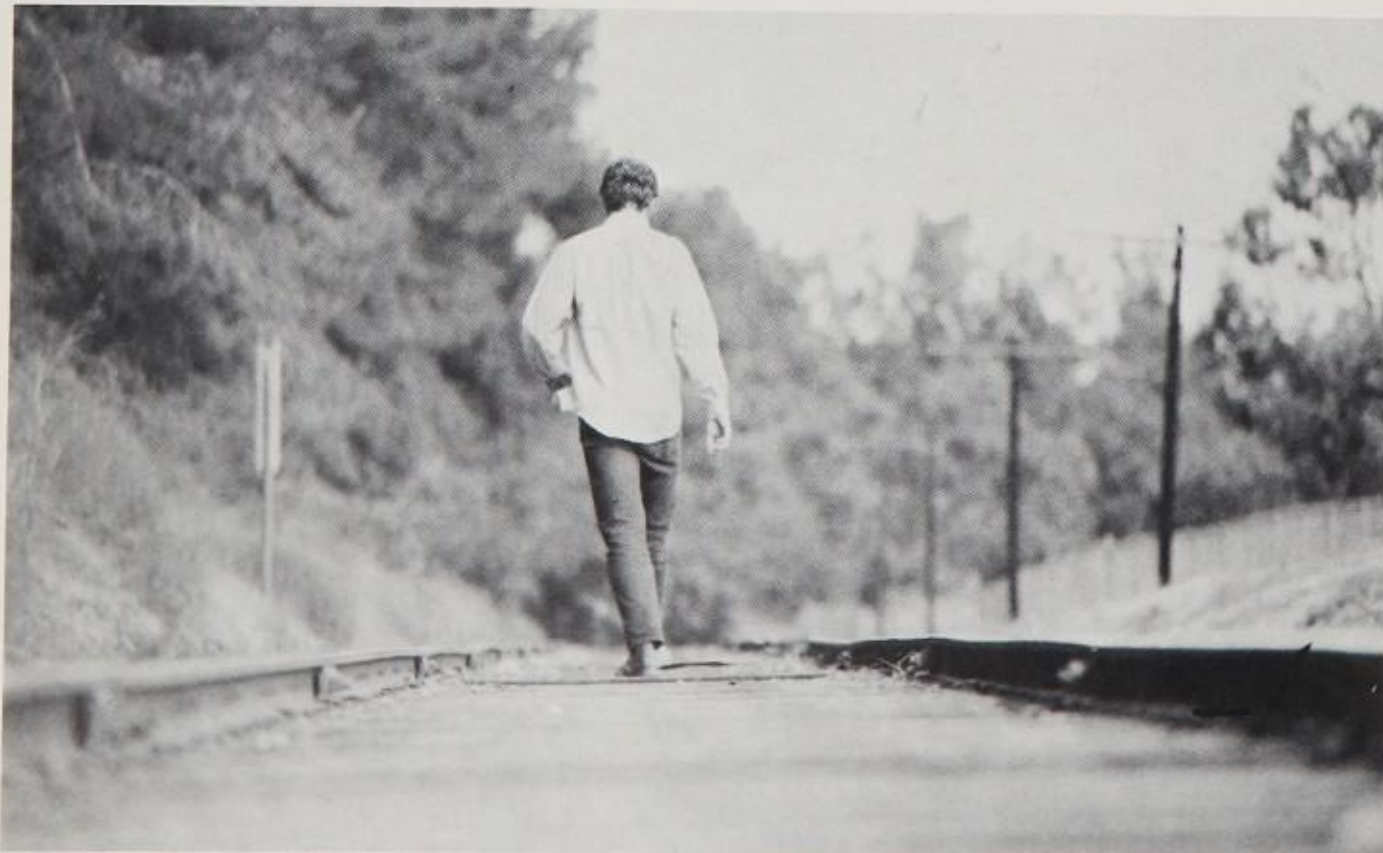

... to dwell beyond environment,  
(physical and mental) ...

... seeking all other's way  
individual under gods ...

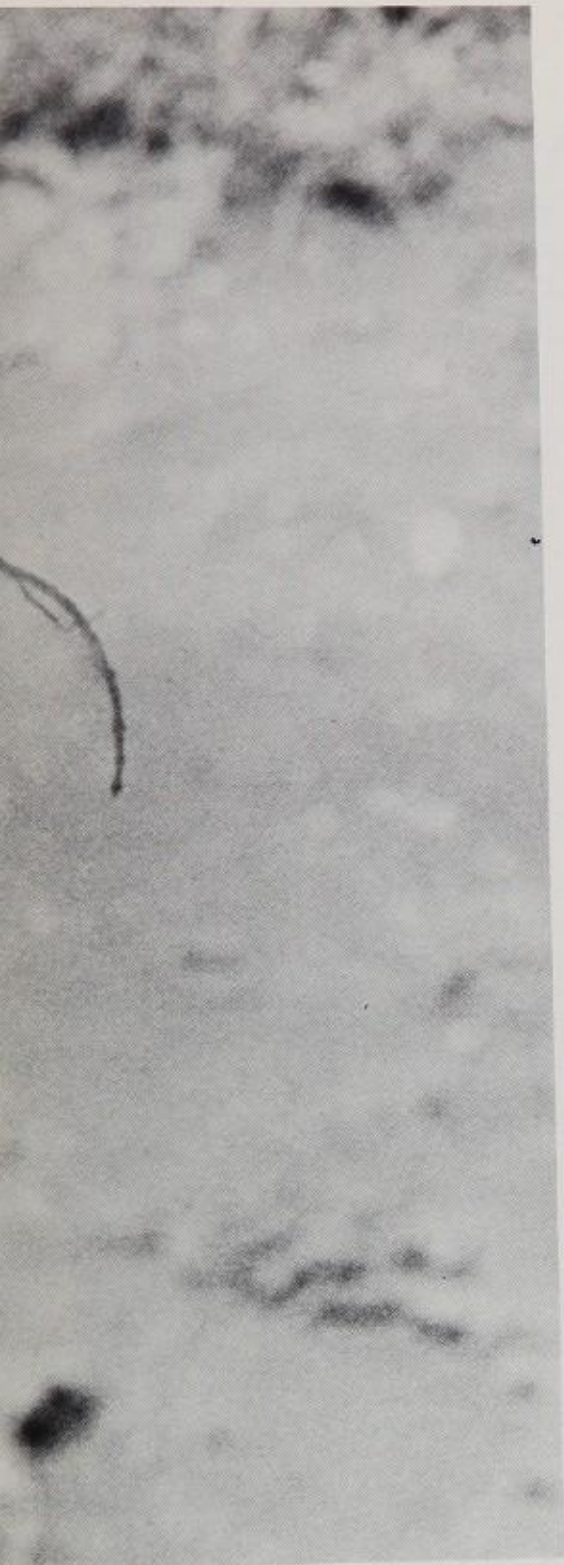

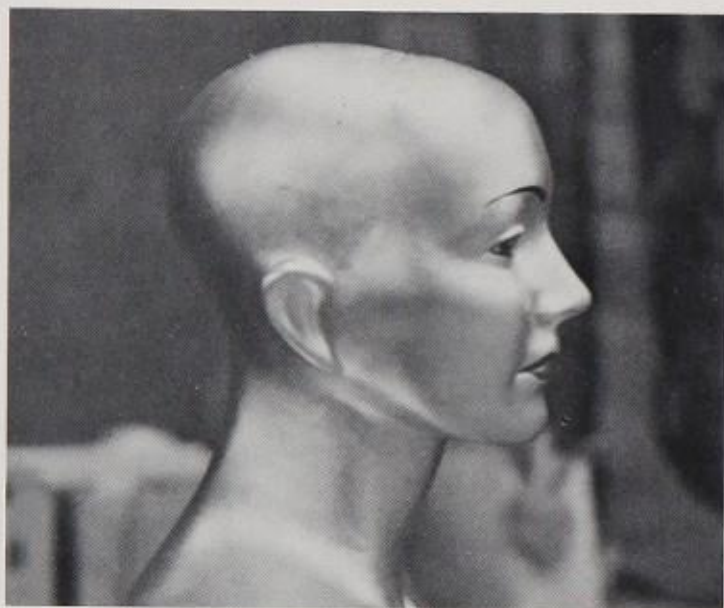

. . . I stretched myself . . .  
under greyest of skies . . .  
days upon days I pondered . . .

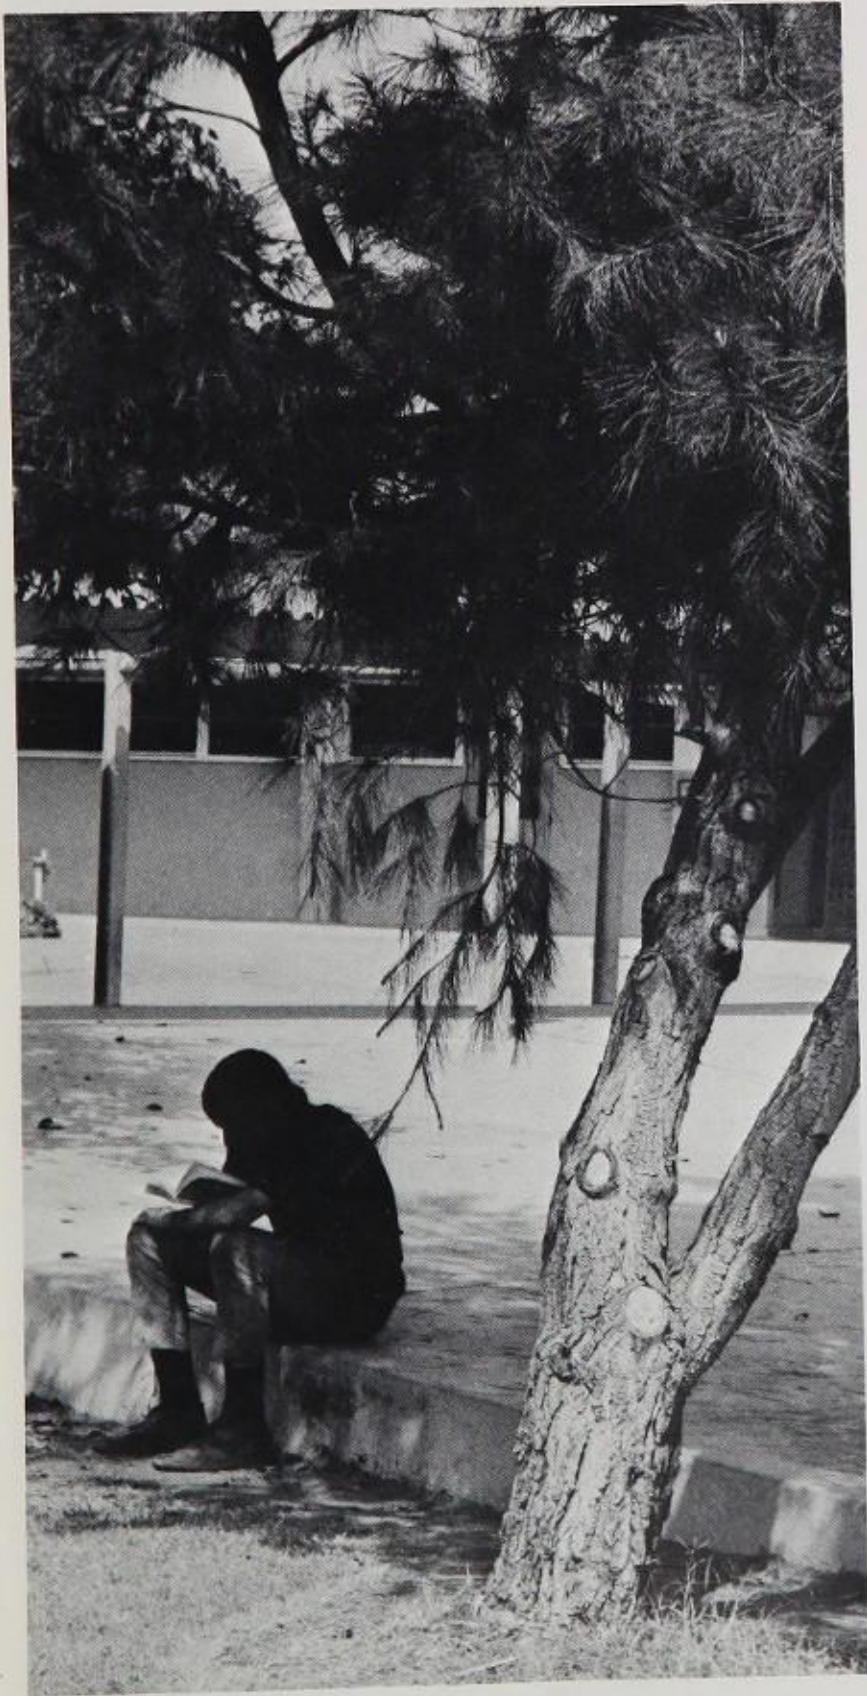

... who tells you who you are?

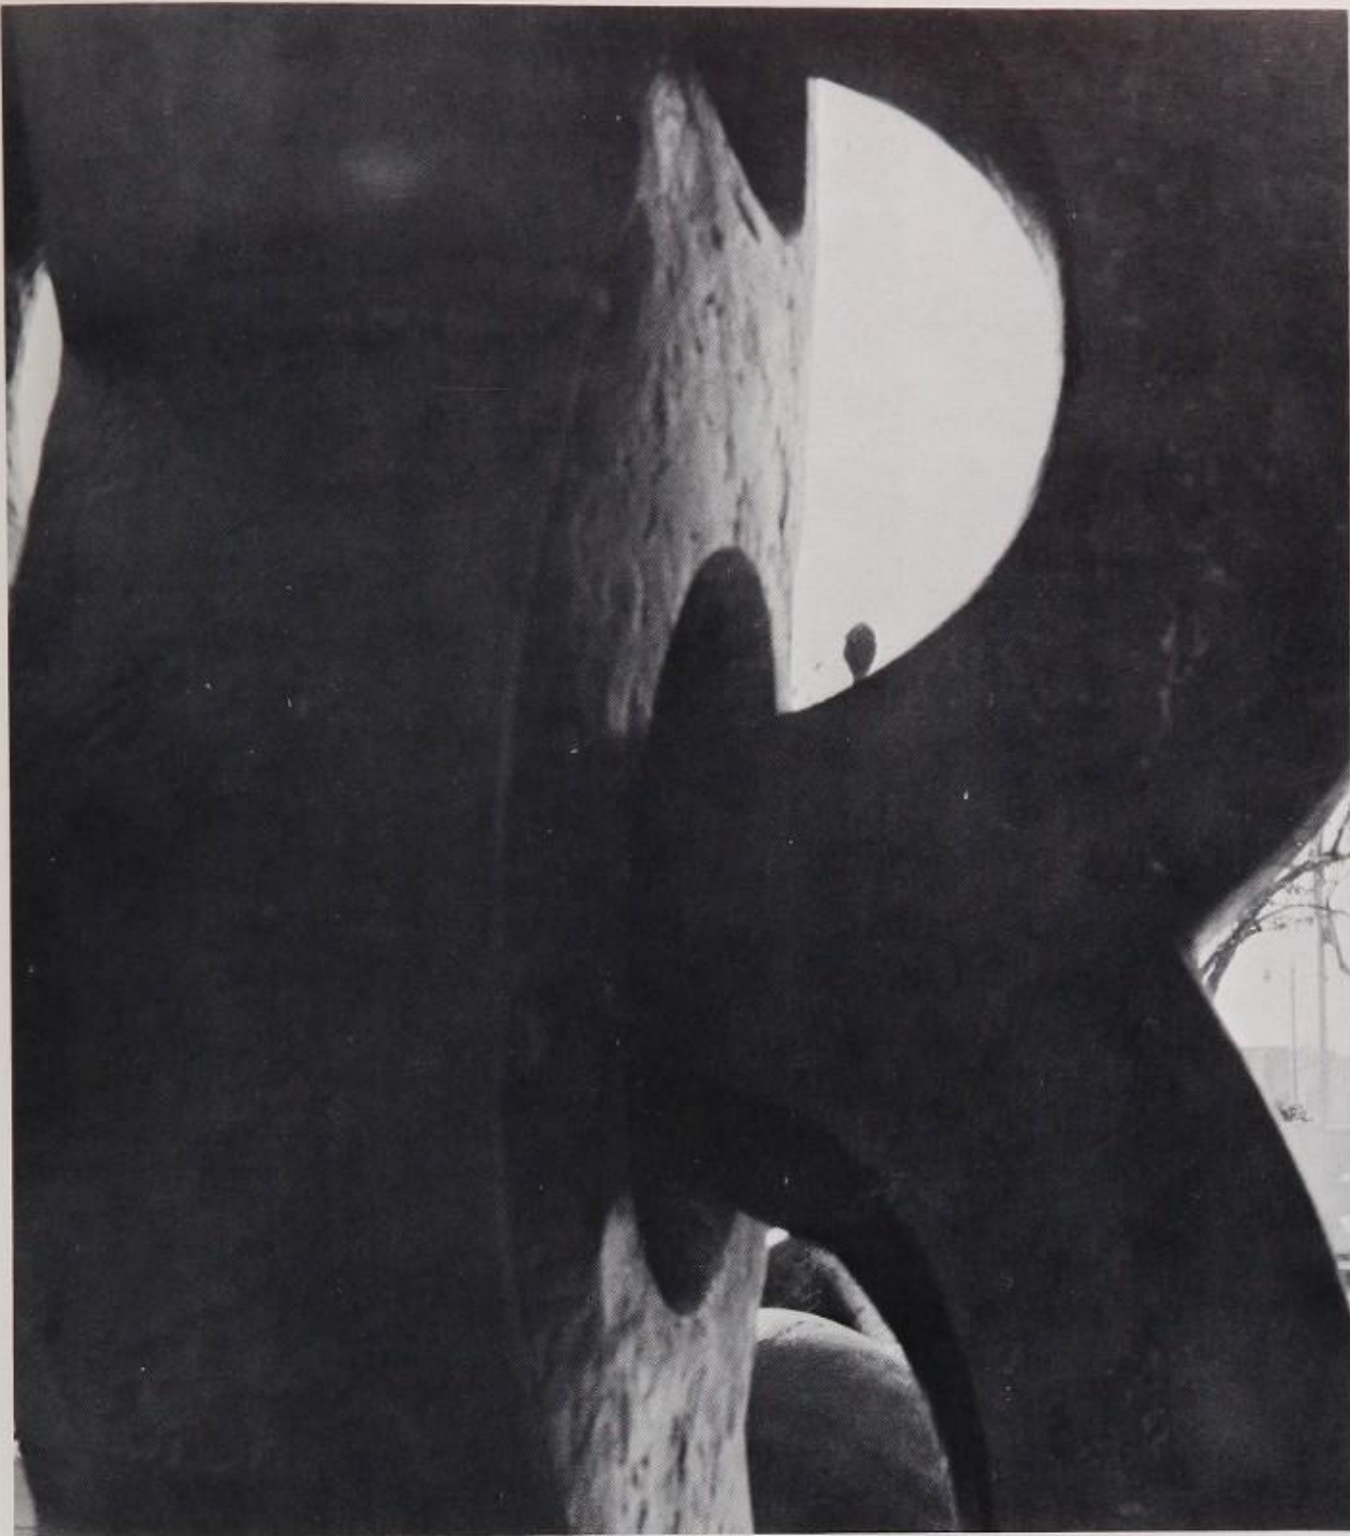

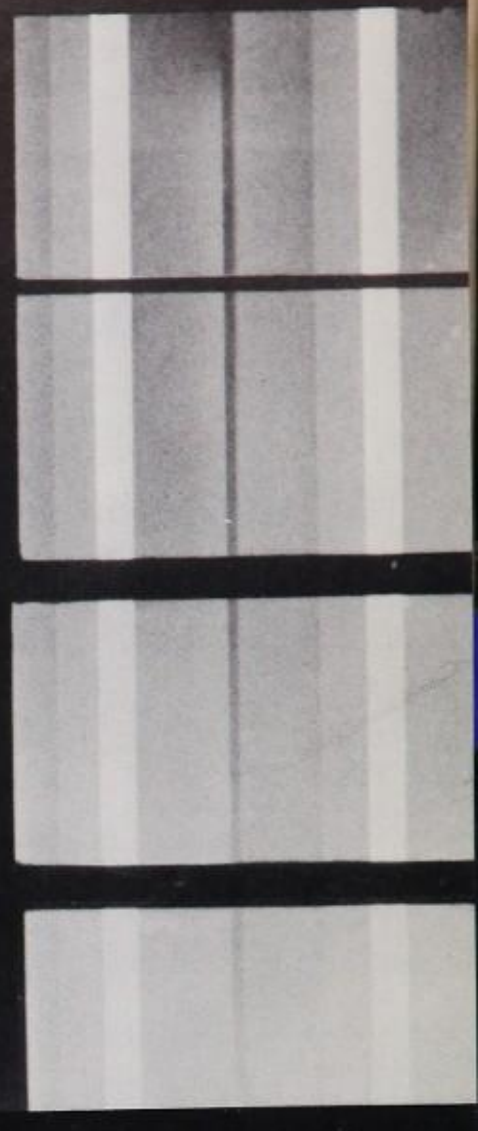

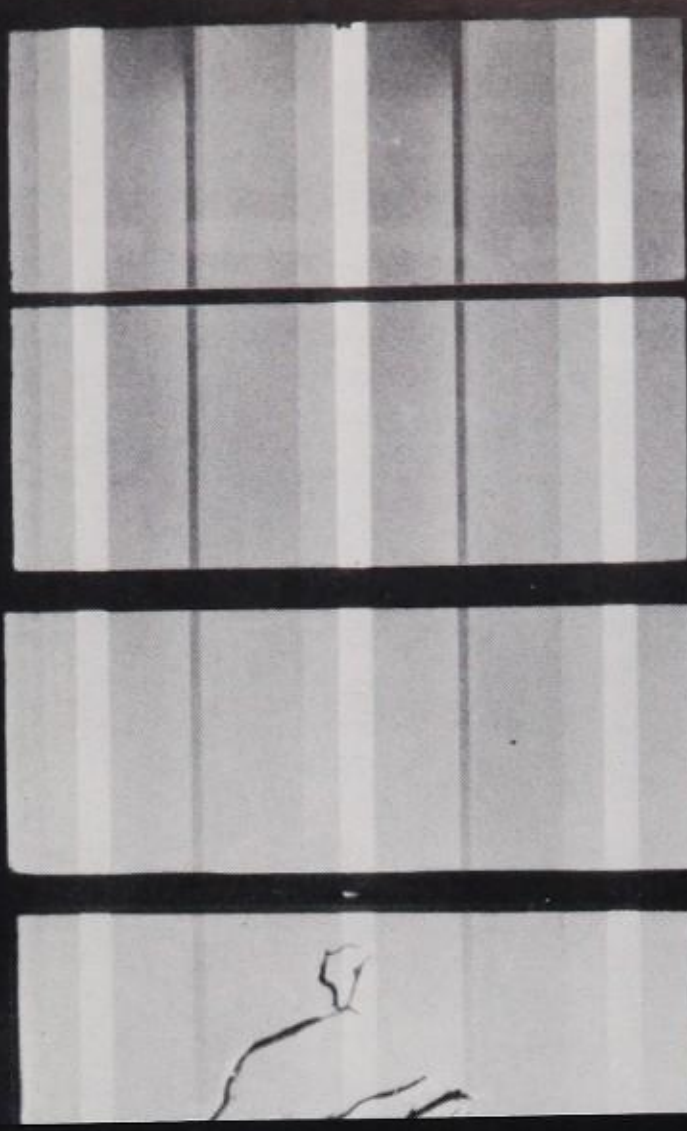

... how I am young  
as I am the master  
of my ship, its rudder,  
its gale, its port from  
which it no longer needs to sail.  
Which is today,  
this very moment,  
now.

For if I tell you that this would be a disobedience to a divine command, and therefore that I cannot hold my tongue, you will not believe that I am serious; and if I say again that the greatest good of man is daily to converse about virtue, and all that concerning which you hear me examining myself and others, and that the life which is unexamined is not worth living—that you are still less likely to believe.

Speech

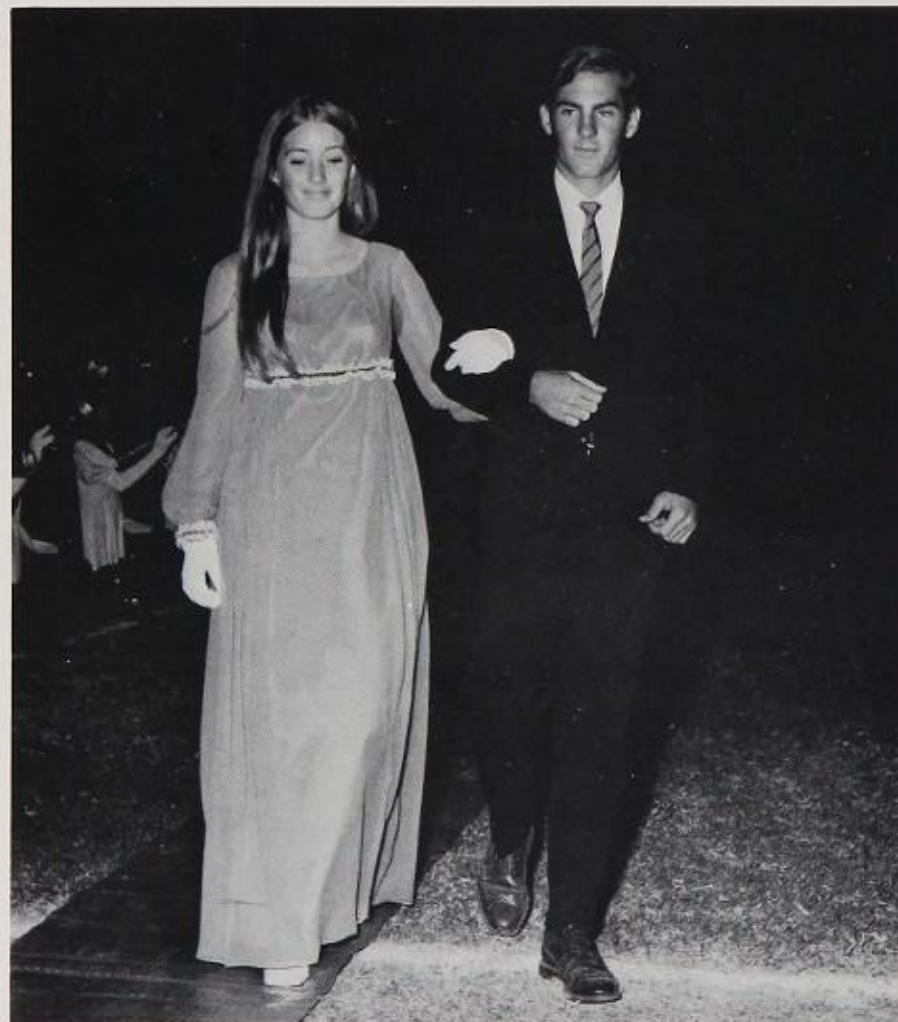

The time came: the time comes: the speakers  
 Come and these who speak are not the People.  
 These who speak with gunstocks at the doors:  
 These the coarse ambitious priest  
 Leads by the bloody fingers forward:  
 These who reach with stiffened arm to touch  
 What none who took dared touch before:  
 These who touch the truth are not the People.

There will be time,

There will be time

It is wise and courageous and temperate and just.

The intelligence of the ignorant  
And the conventional people  
Is about the same.  
The conventional people follow the ignorant  
And the ignorant have a mind completely veiled.  
Remove the veil and the ignorant become wise;  
Leave the conventional man uncontaminated  
And his mind remains pure.

Has to have perspective.

Come down on your own . . .  
... somebody must change  
You are the reason  
I've been waiting all these years  
Somebody holds the key  
I'm near the end and I just ain't got time  
Oh and I'm wasted  
And I can't  
    find  
        my  
          way  
            home.

Lower your eyelids  
over the water  
Join the night  
like the trees  
you lie under

How many crickets  
How many waves  
easy after easy  
on the one way shore

There are stars  
from another view  
and a moon  
to draw the seaweed through

No one calls the crickets vain  
in their time  
in their time  
No one will call you idle  
for dying with the sun

... can I walk beside you  
I have come here to lose the smog ...

. . . I feel to be a cog inside something turning . . .

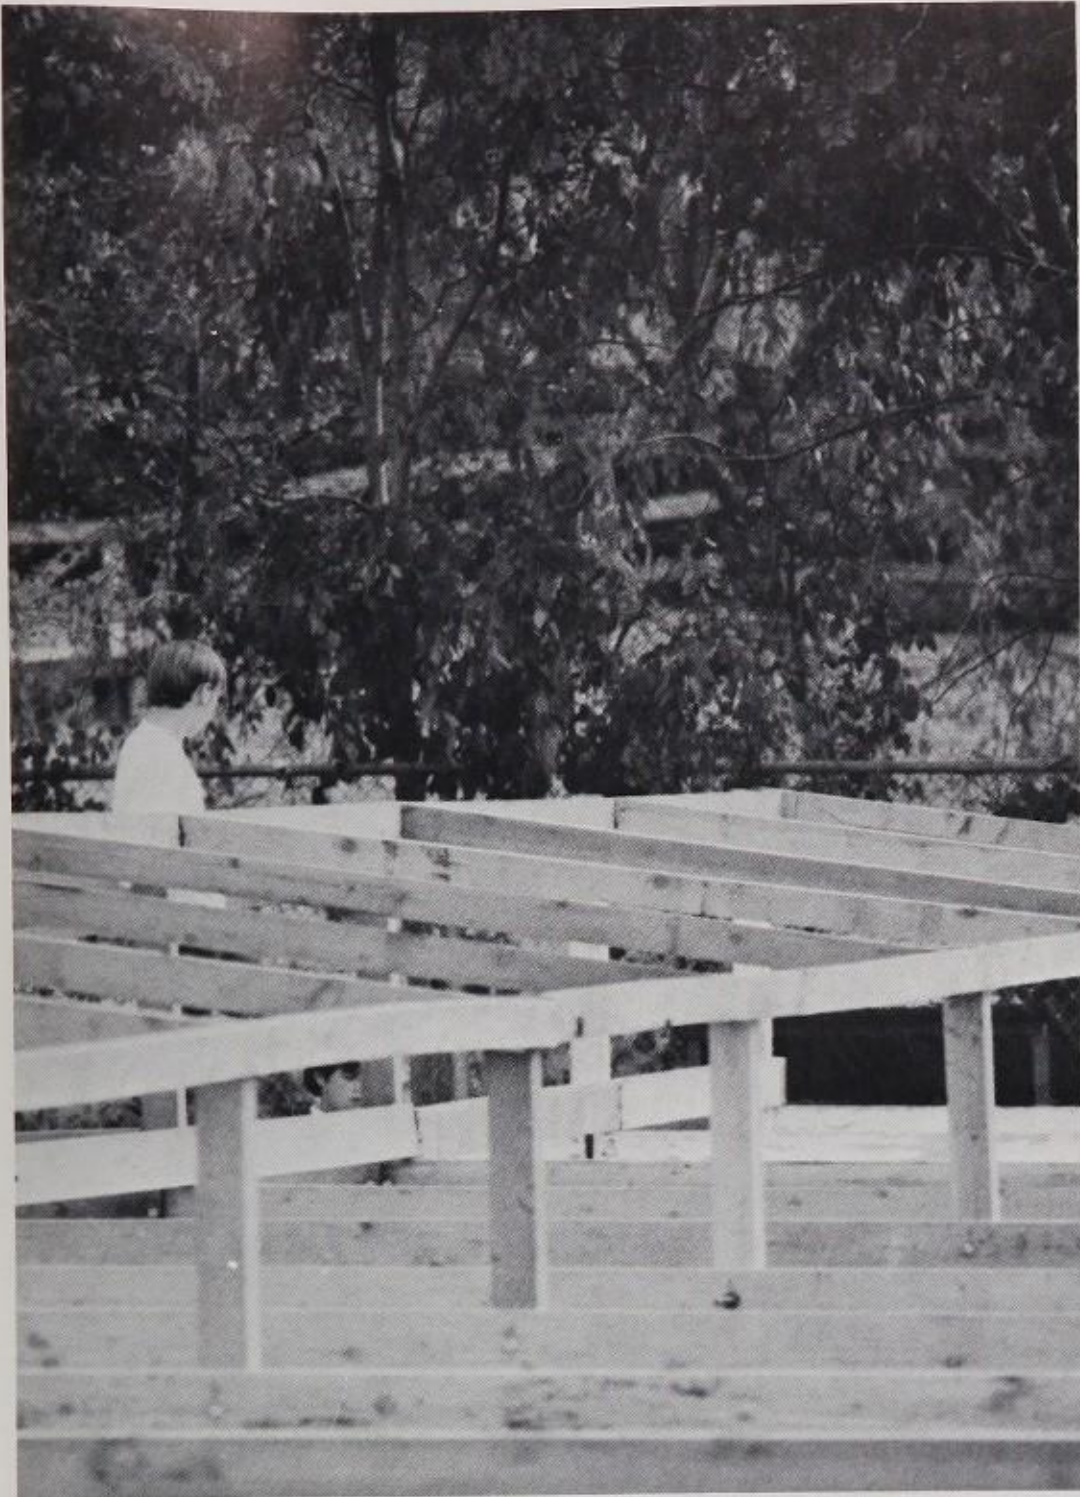

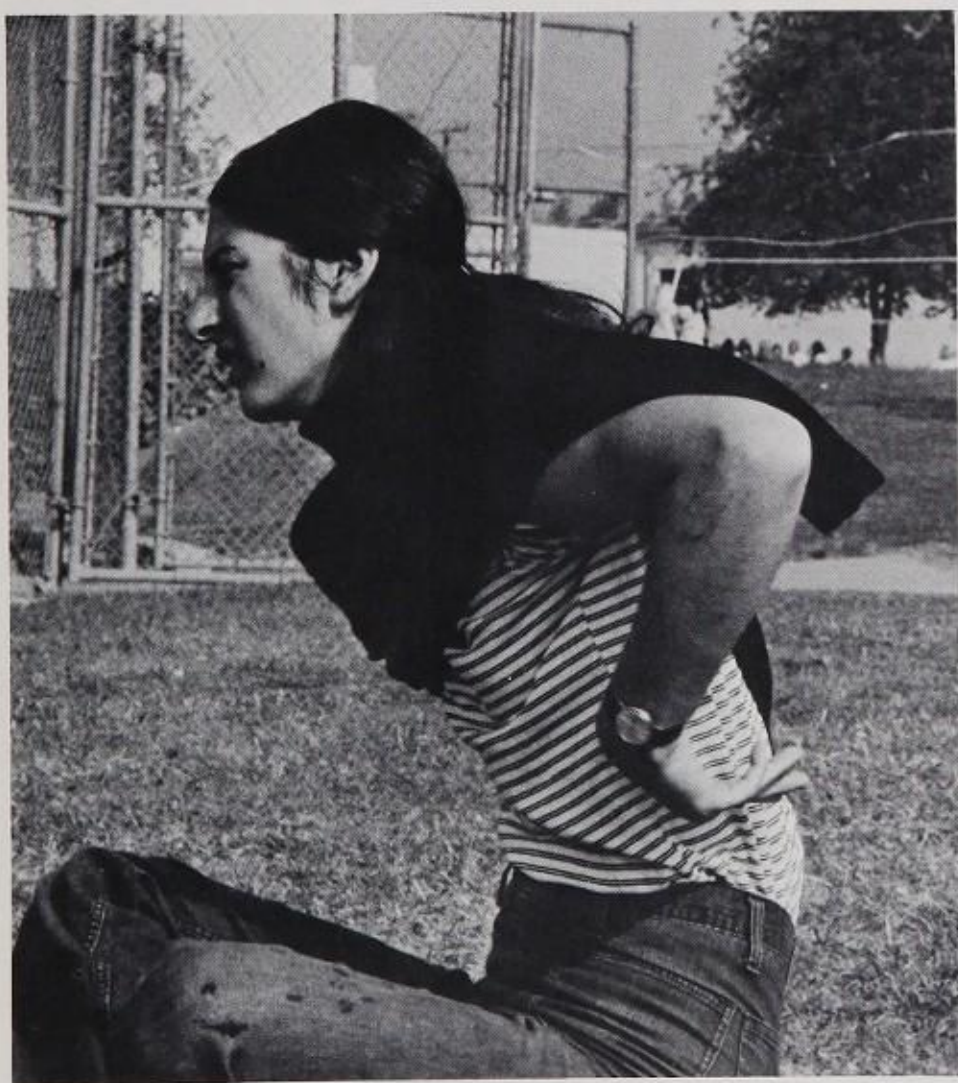

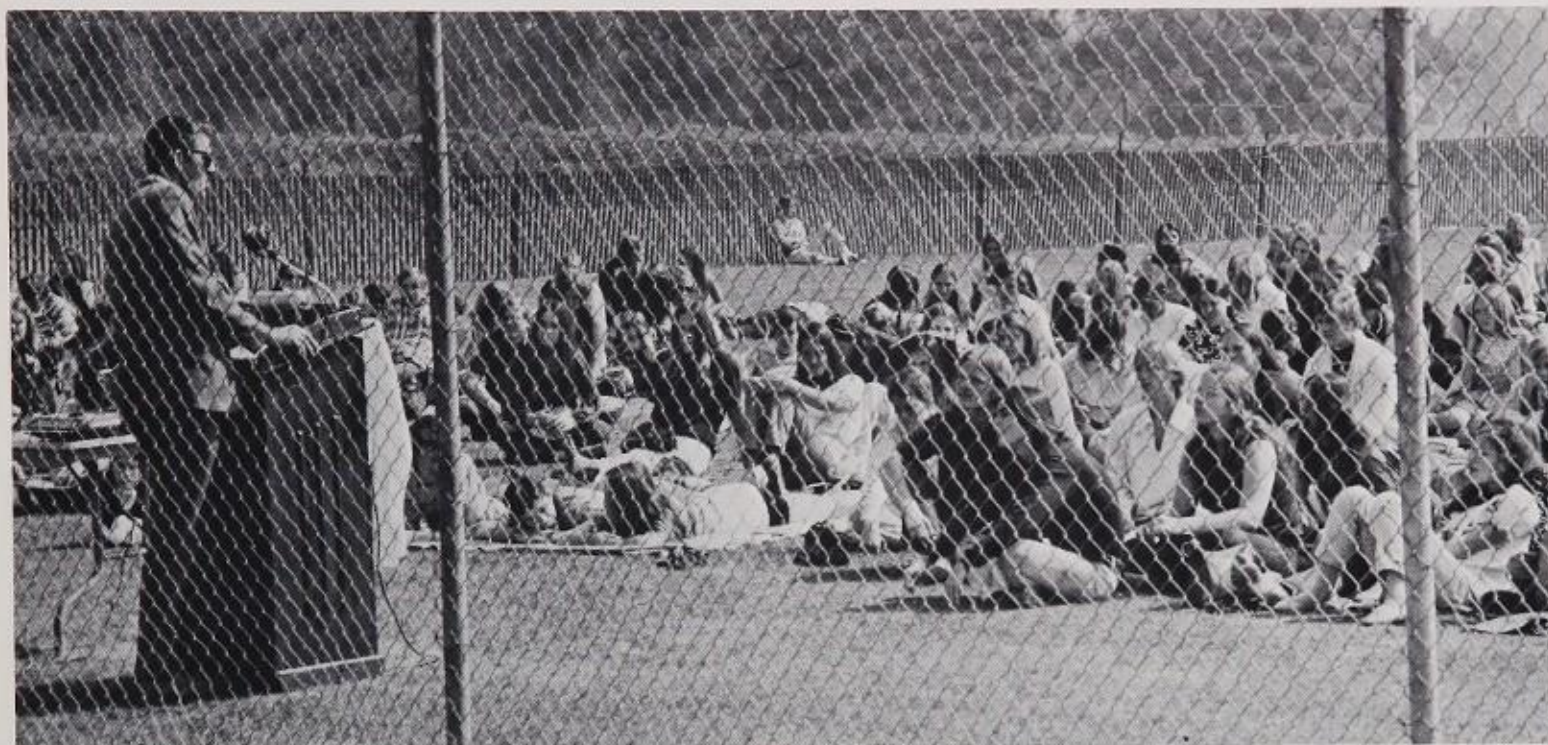

... maybe it is just the time of year ...

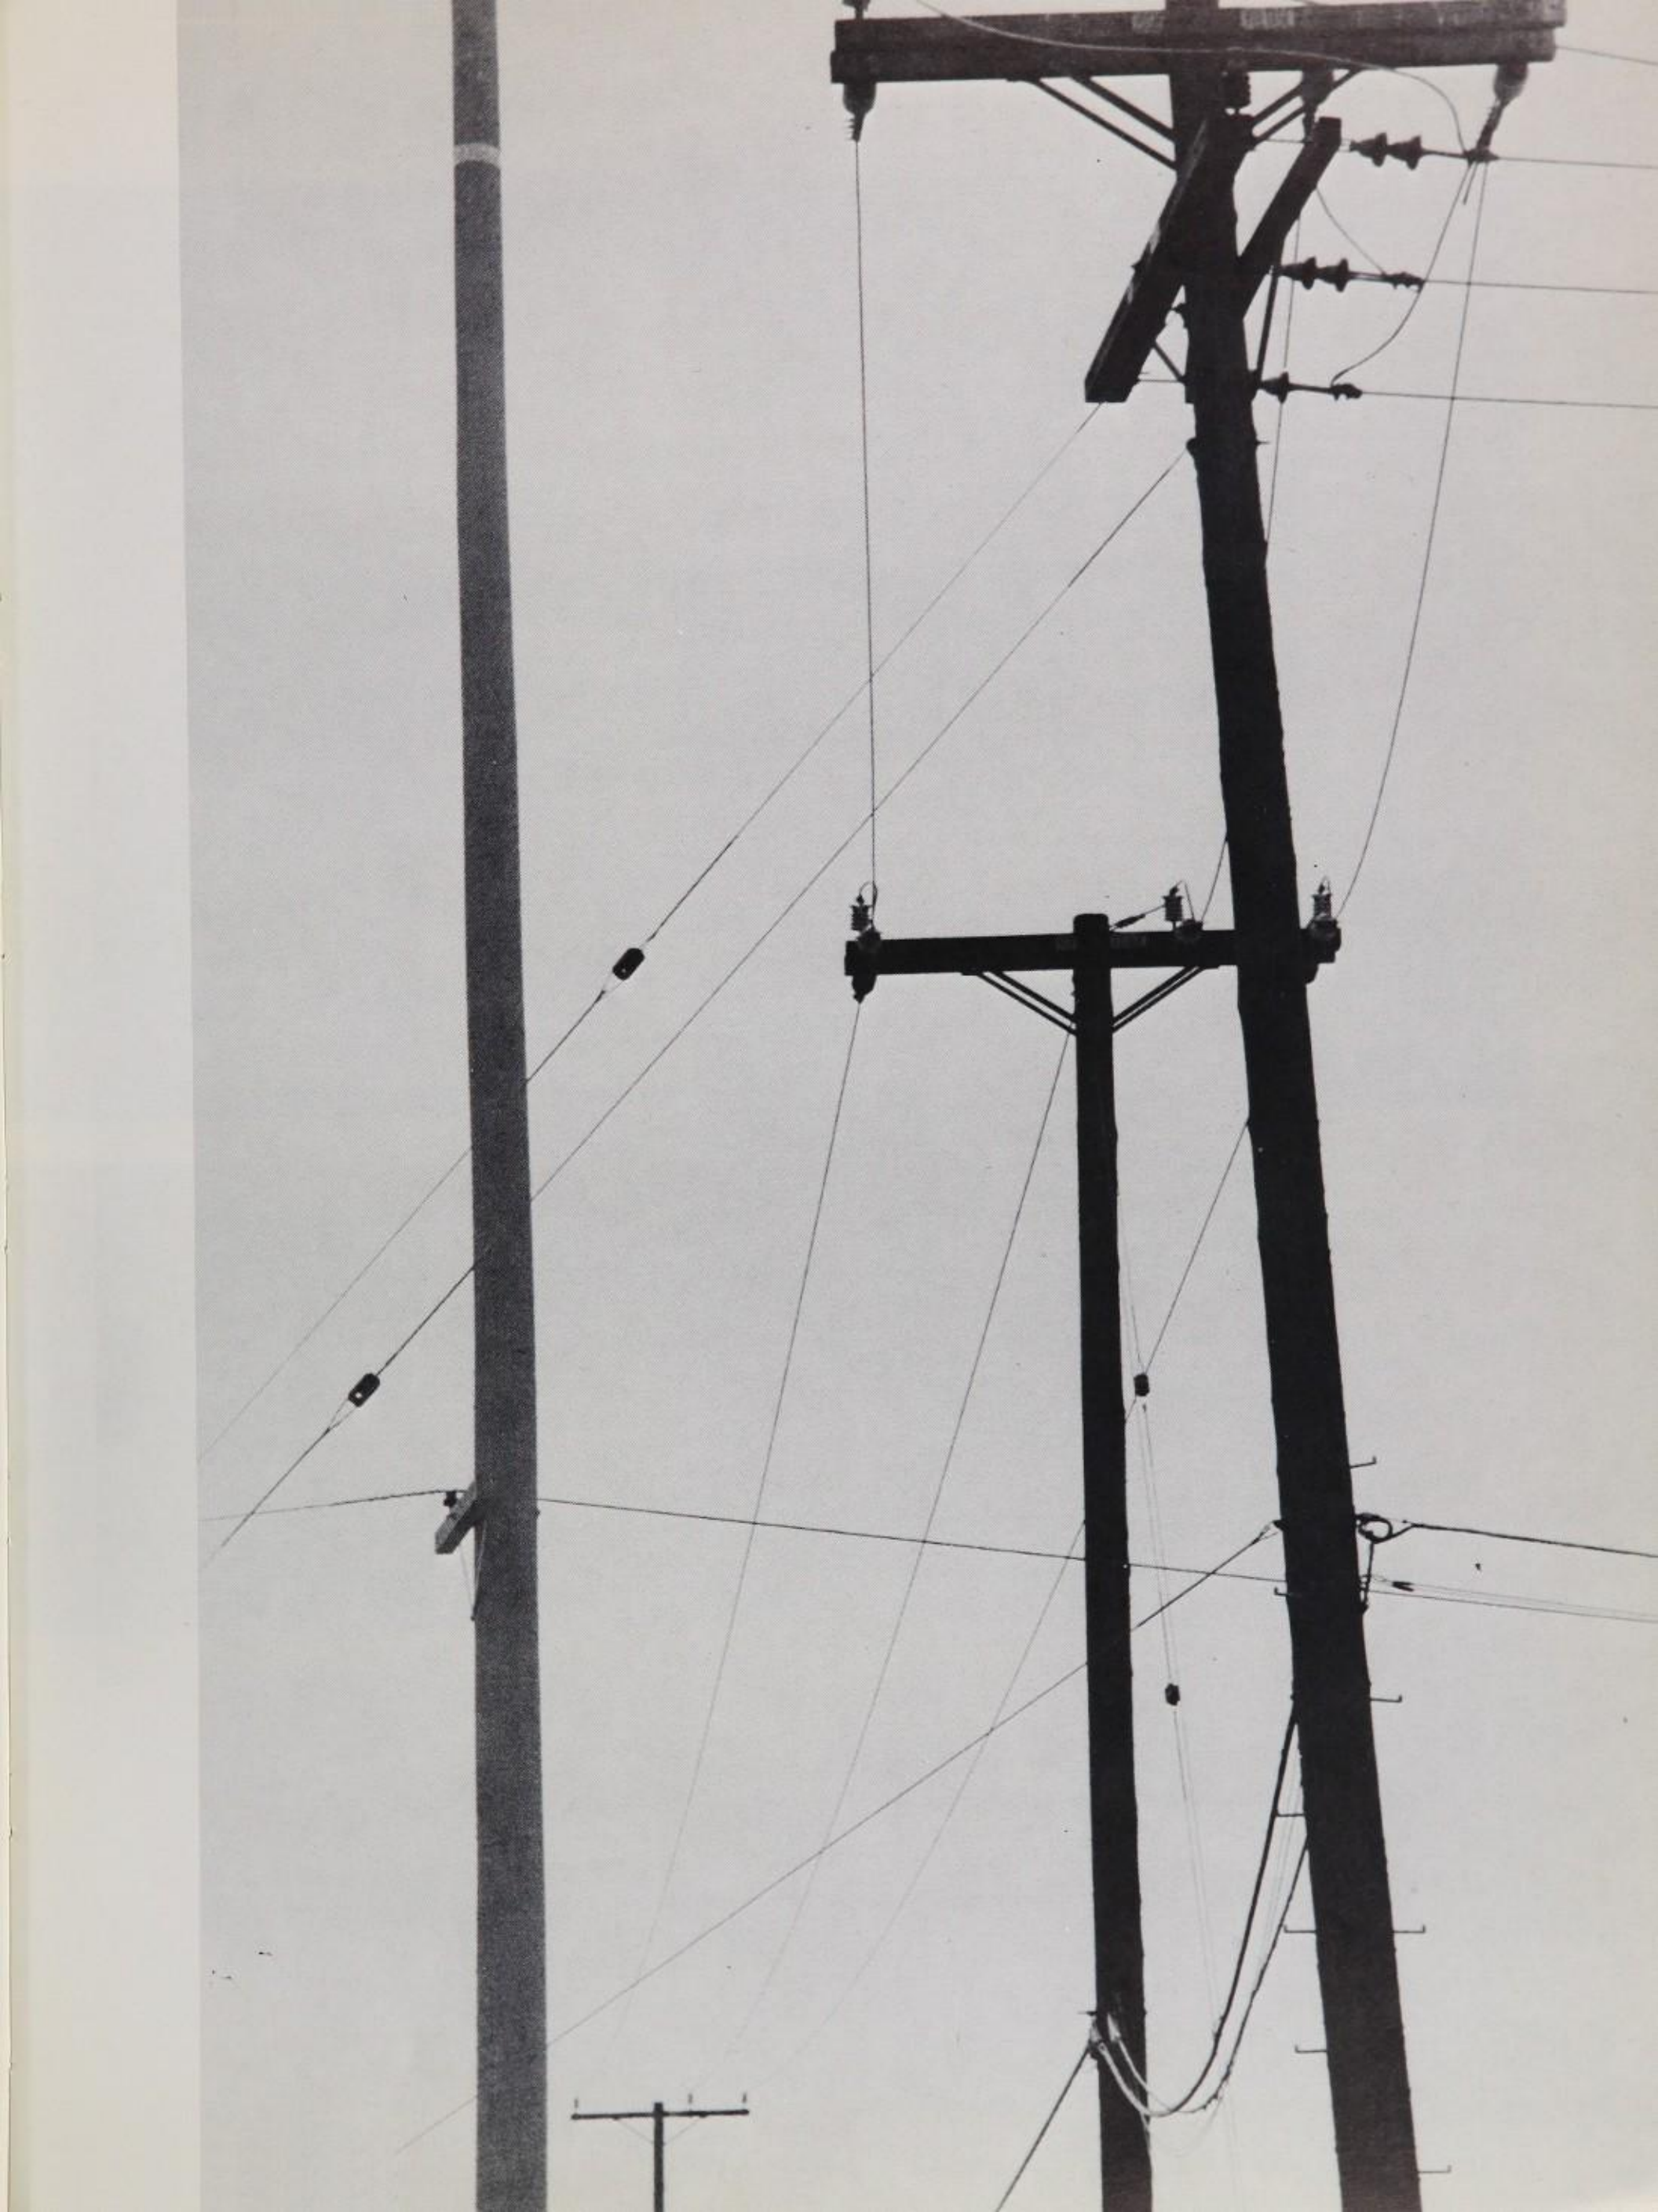

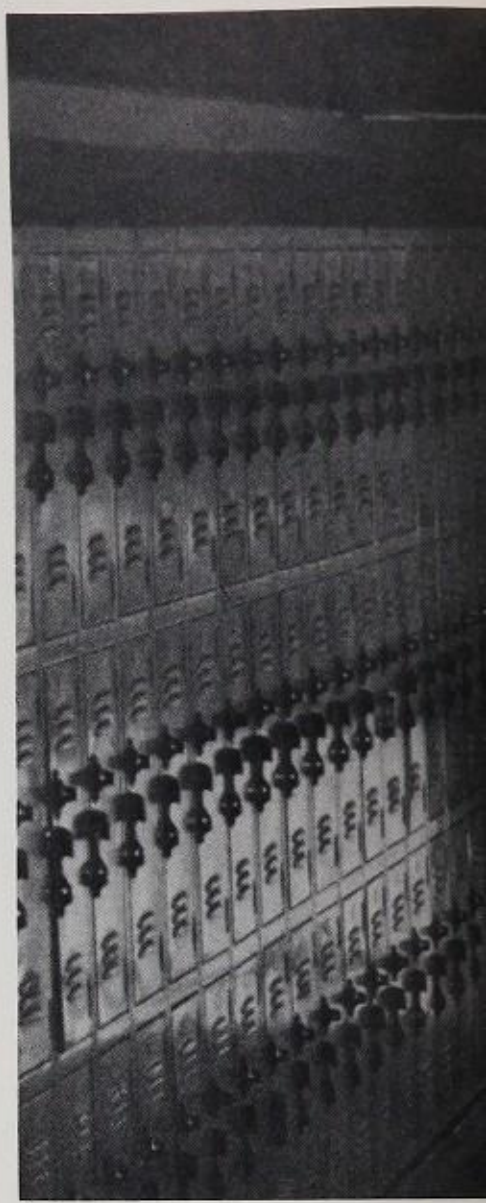

... or maybe it's the time of man ...

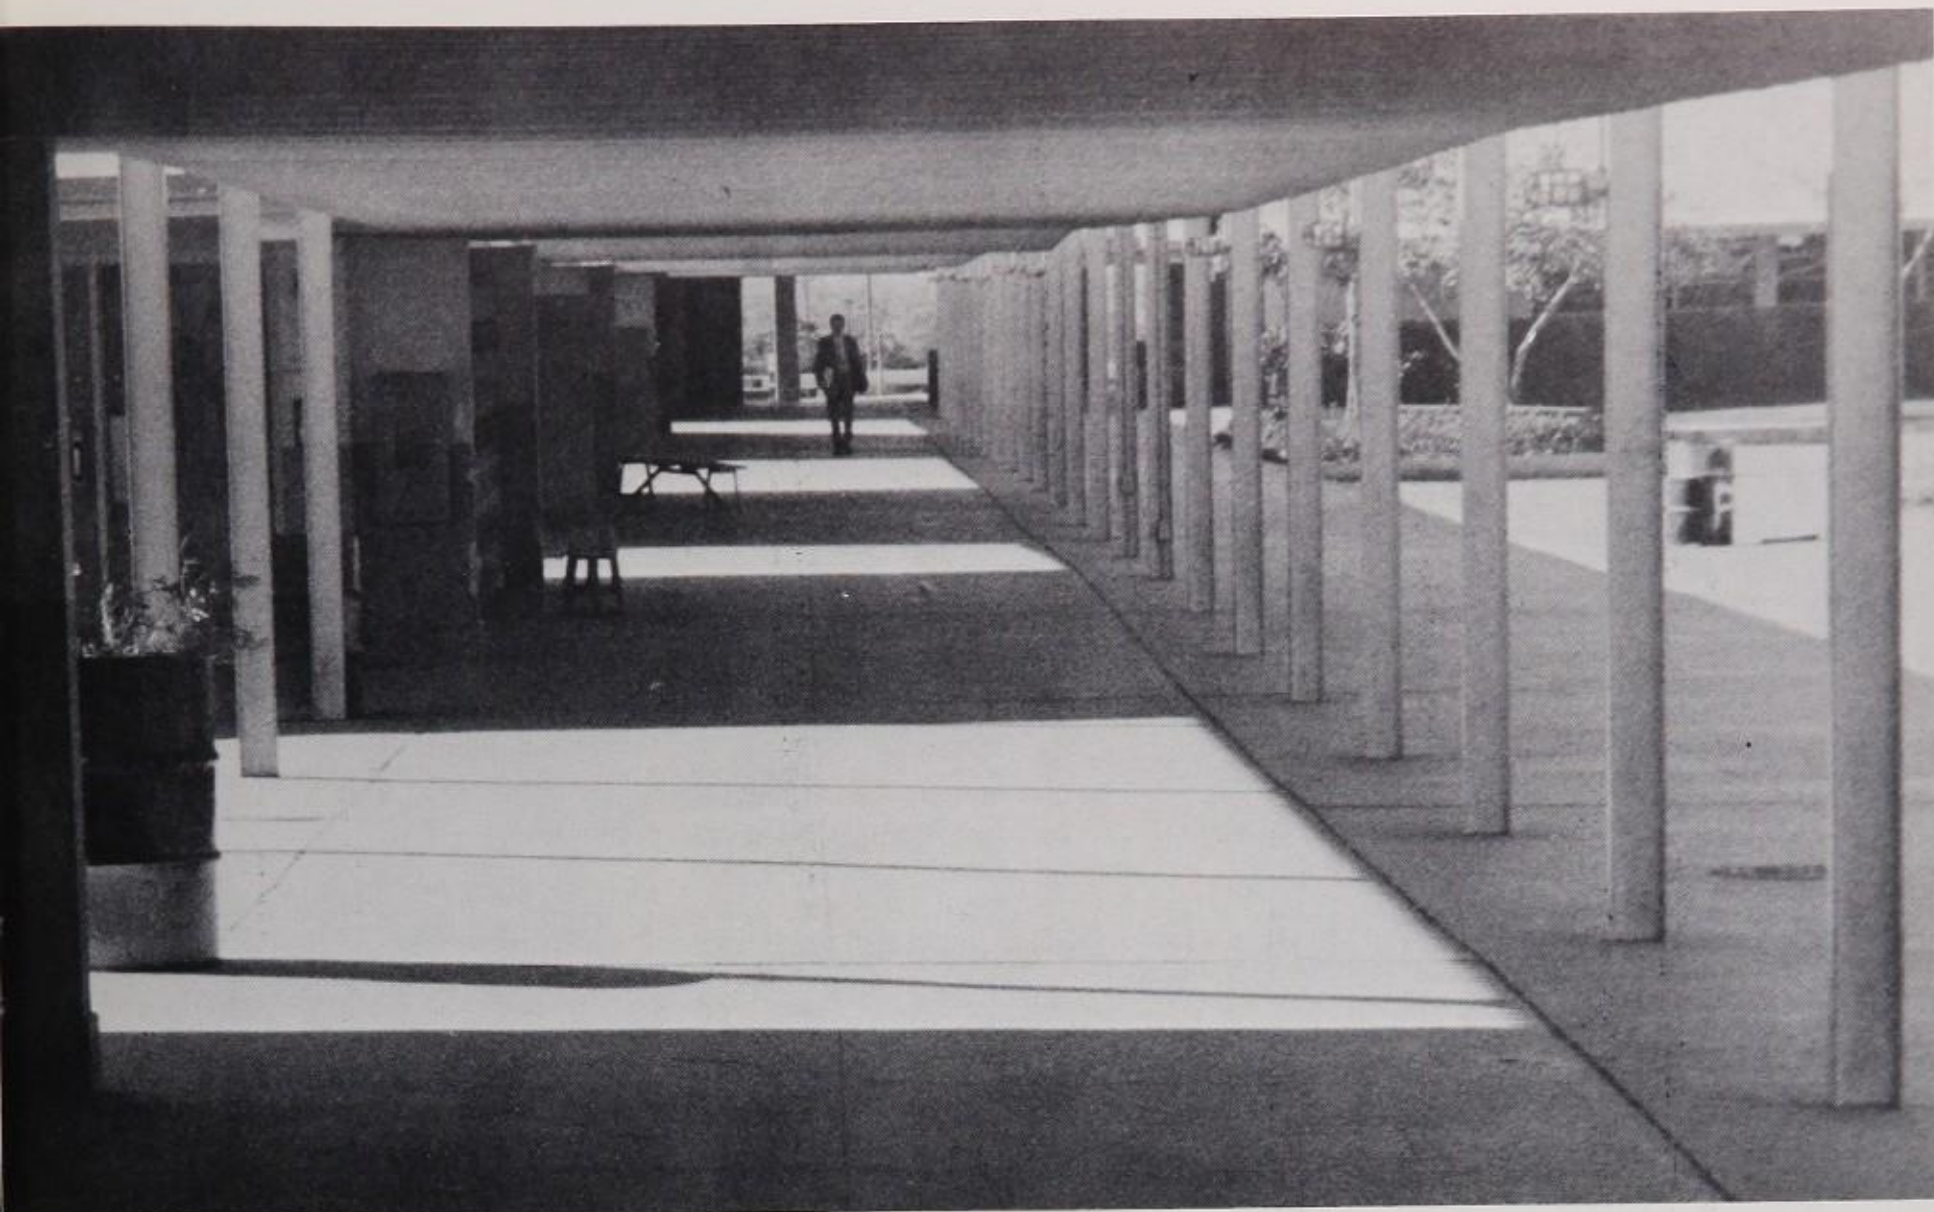

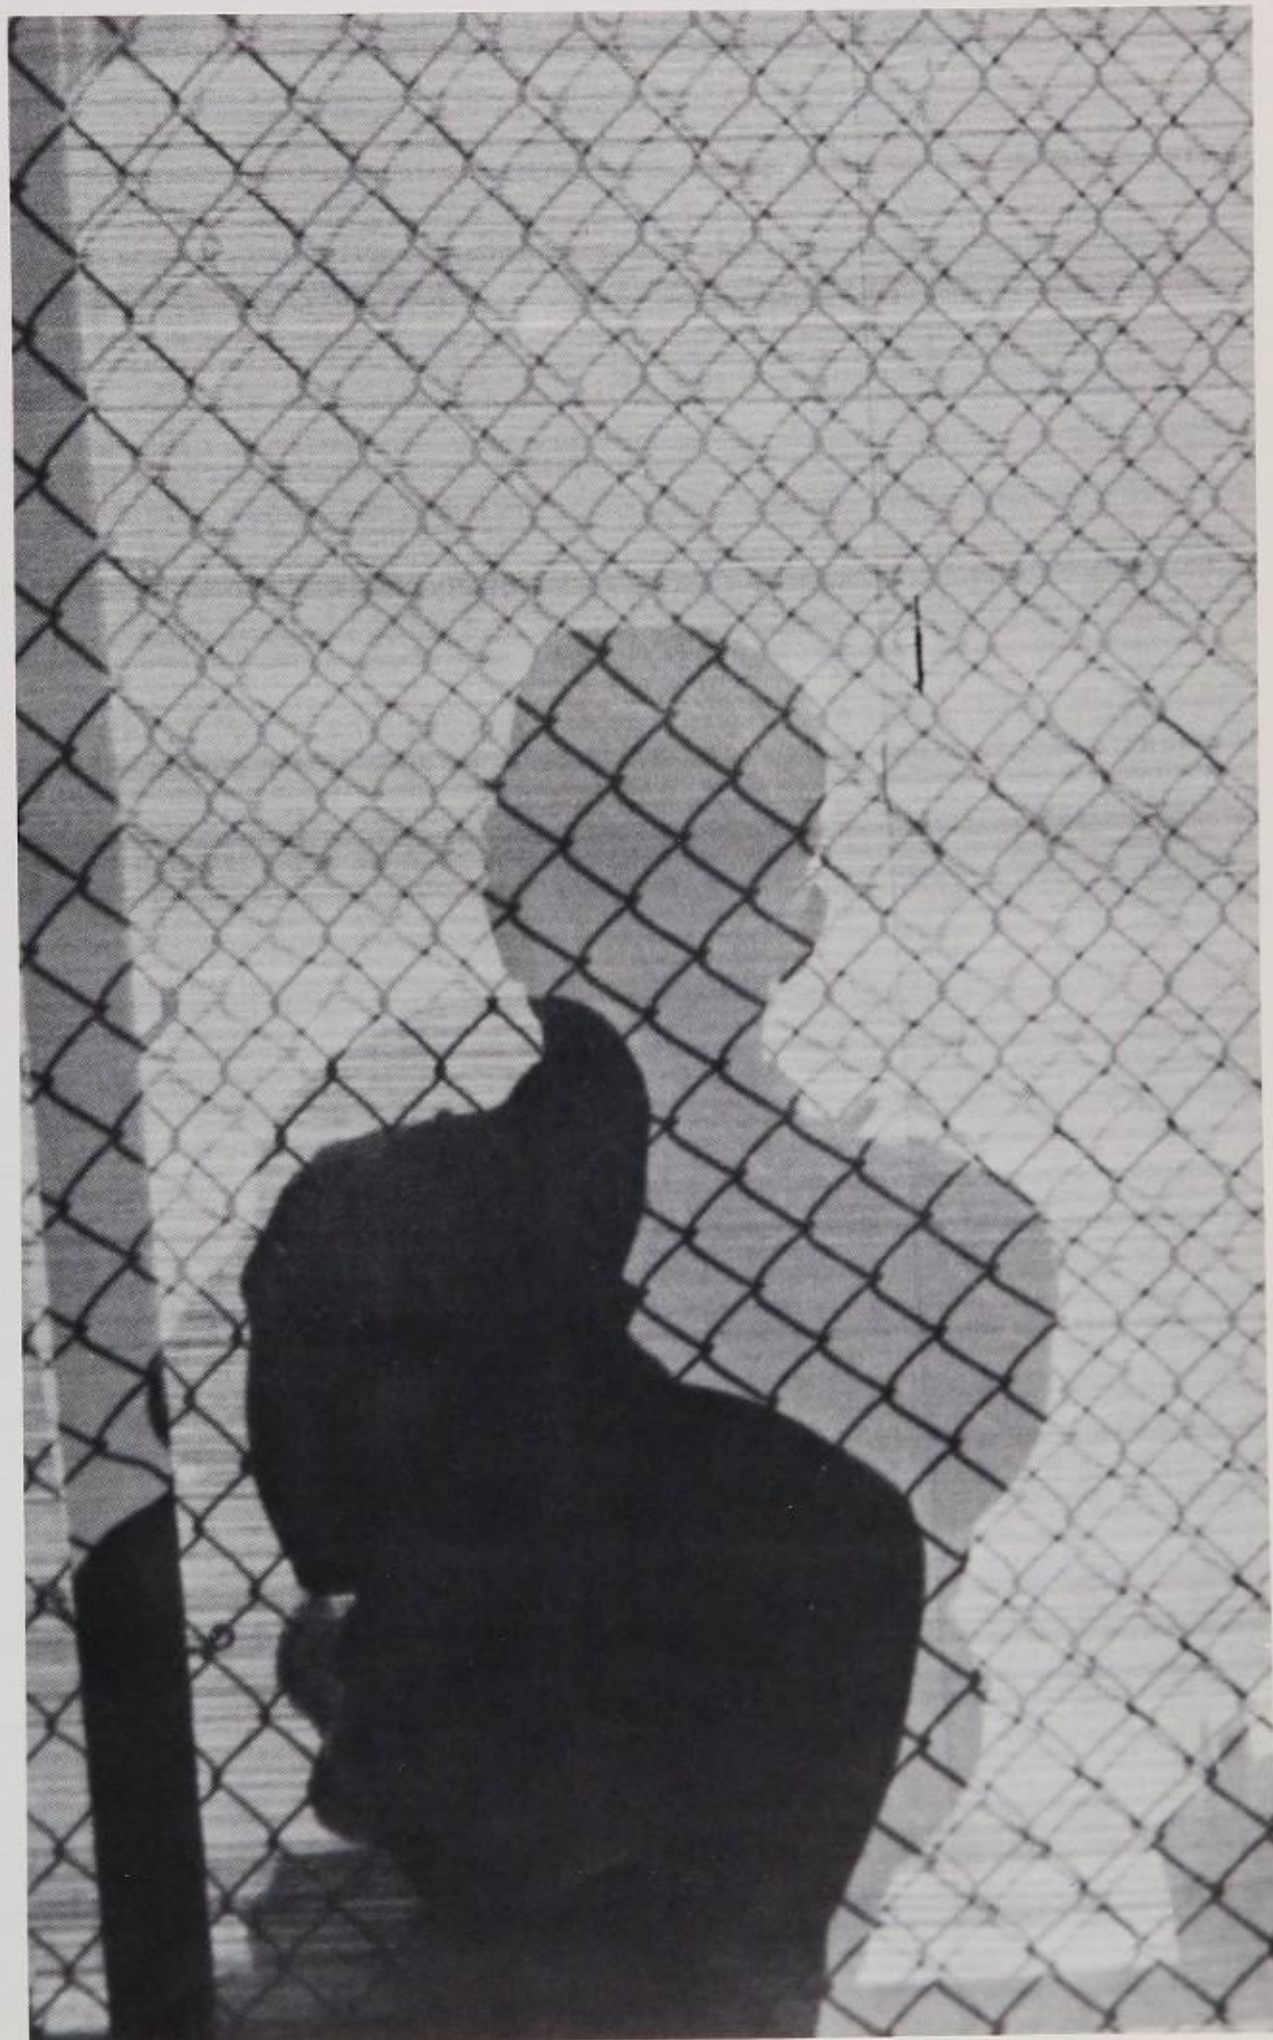

... I don't know who I am ...

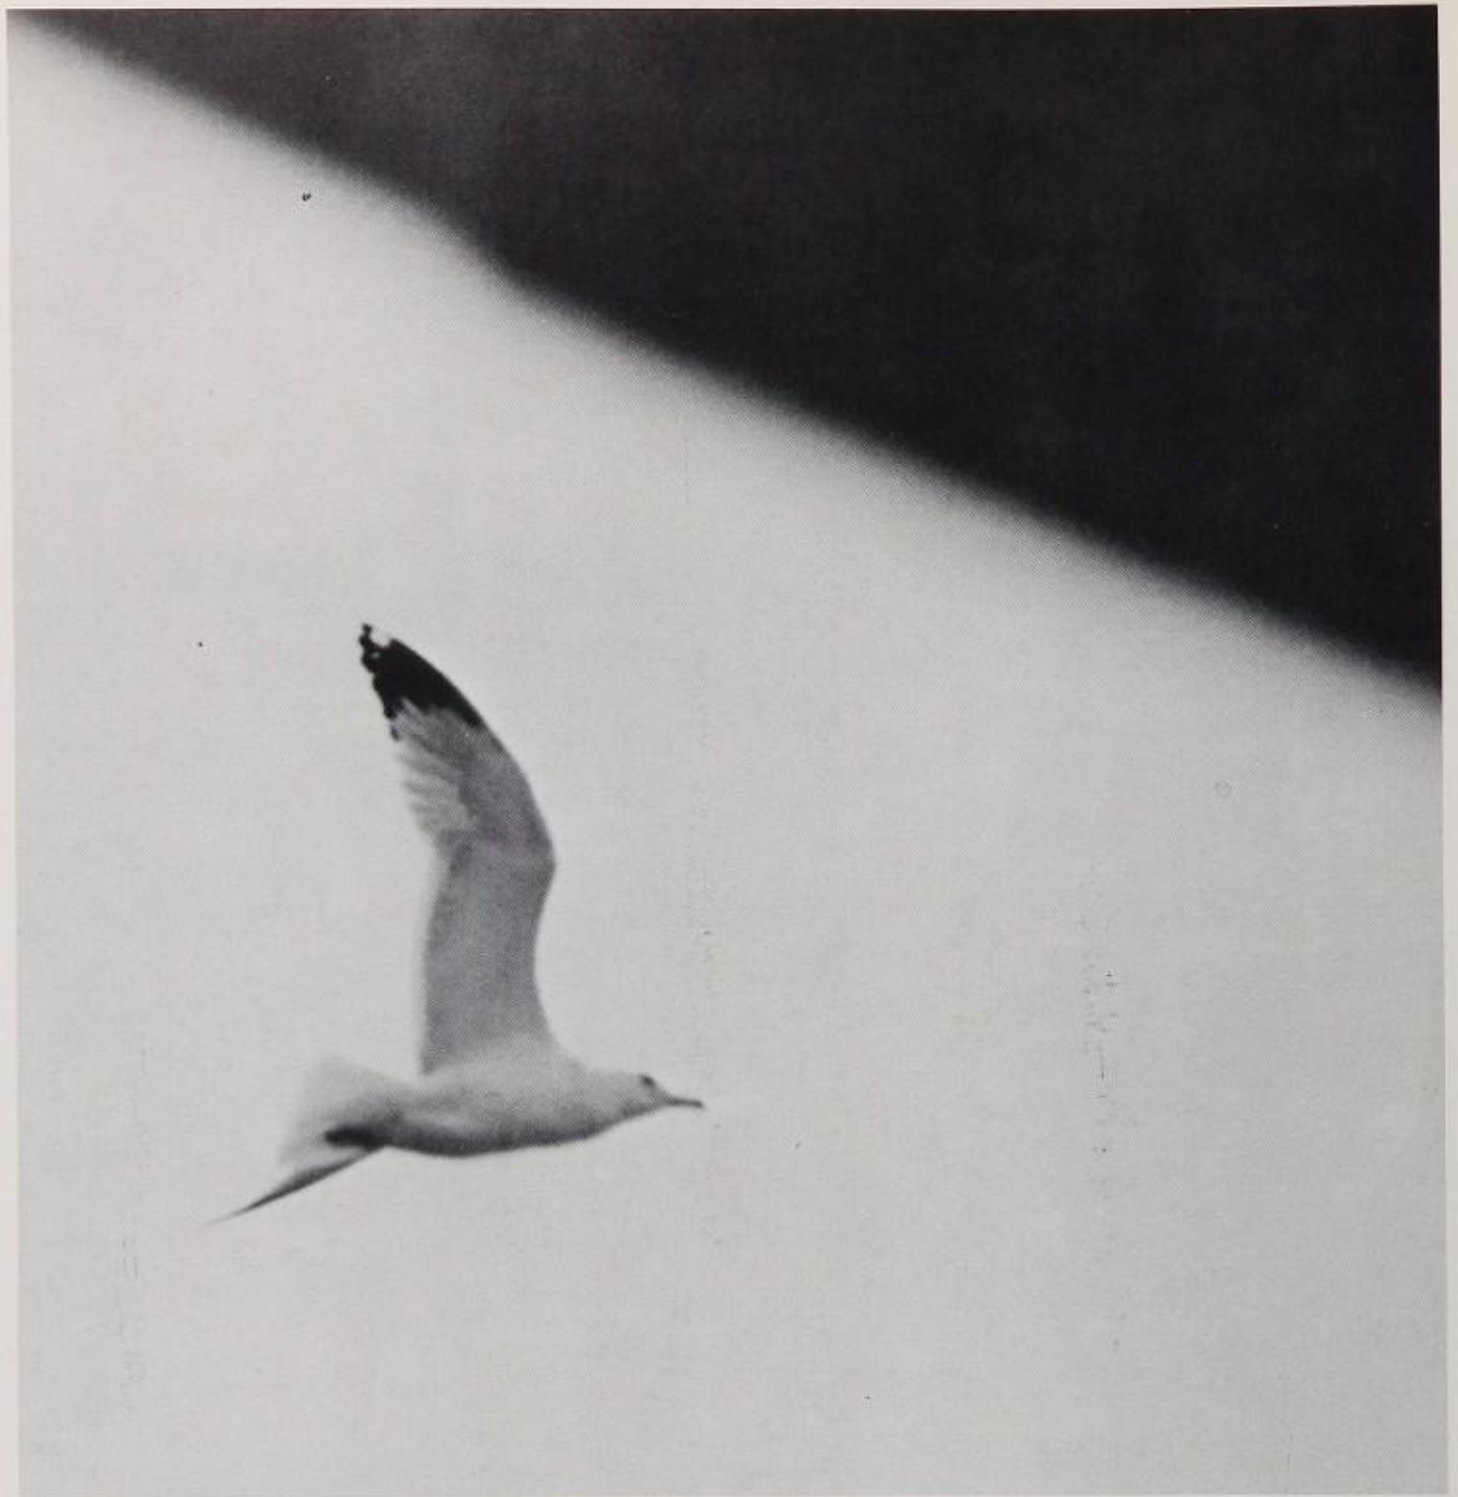

... but life is for learning ...  
Joni Mitchell

"... and I took this orange and I just turned it over and over in my hand until my hand had just absorbed the feel of it, and I smelt the orange, and then I started to peel it . . . very, very carefully, and do you know what I found? Fine powdery flaky stringy things — a whole layer of them. Under this lumpy skin. So I very carefully pulled off the white strings and uncovered these crescent-shaped fat things. Fat orange crescents, and they squeezed juice. Can you imagine that? And I tasted one, and it was sweet and a little sour, too, you know? But then, as I ate it, I discovered there was still more to this orange, a pulpy, ropy mass in the center. And then, two seeds that would probably have turned into oranges themselves—and I want to tell you, all of you, that this is it, this is really it, to get an experience from so simple a thing as an orange, to find out it's not so simple—if you can do this without embarrassment, without worrying about what your friends will think, then you've really done something for you . . ."
